## A144 SILICONE WATER REPELLENT

**Features:**

A transparent solution of silicone resin, designed to waterproof porous substrates such as brick, cement and natural stone, allowing the substrate to “breathe” whilst still acting as a water repellent.

**Availability:**

In 5, 2.5 and 1 Litre containers.

**Volume Solids:**

15% ± 3% (BS 3900 Part A10).

**Preparation:**

The substrate must be thoroughly clean, dry and free from dust and grease. Ensure all cracks are repaired before application of A144. Not suitable for use on previously coated surfaces.

**Application:**

Brush, roller, conventional or airless spray. Supplied ready for use. Apply generously to all surfaces. Two coats may be necessary on rough stonework, in which case allow 8 hours drying between coats for increased penetration.

**Coverage:**

Approximately 20 - 50 sq metres per 5 Litres, depending on porosity of surface.

**Drying:**

4 hours @ 20°C.

The foregoing information is given in good faith, based upon tests and experience. It should be noted that recommendations are made without guarantee, as the use of this product is beyond our control.  
See Standard Conditions of Sale.

Before using any product, please read the appropriate Material Safety Data Sheet and carry out a full risk assessment for the intended use and method of application.
