

TECHNICAL PAINT SERVICES

X16 STRIPPER WATERWASH

Features:

A powerful, efficient paint stripper which will remove virtually all types of paint, including cellulose, alkyd stoving, two pack finishes and most varnishes. Does not stain wood, enabling re-finishing with clear varnish. Suitable for all types of metal without affecting the adhesion of subsequent coatings.

Availability:

5, 2.5 and 1 Litre containers.

Volume Solids:

N/A.

Preparation:

N/A.

Application:

Suitable protective clothing should be worn. Shake tin thoroughly before use and open carefully. Apply with a soft bristle brush, applying thick even coats. Allow to stand for about 10 minutes without agitating, when the paint film can be removed with a scraper or thick brush. Any residue of stripper should be washed away thoroughly with liberal amounts of water, or X13 Gunwash if drying conditions are bad and time is not available to allow drying out before painting. Where excessive paint film is required to be removed, it will be found that several coats applied over a longer period of time will be more effective than one thick coat.

Coverage:

N/A.

Drying:

N/A.
